About the Saudi Riyal Symbol Fonts

The Saudi Riyal Symbol Fonts provides a comprehensive implementation of the official Saudi Riyal currency symbol. Designed by Al-injazat Technologies design team, this package ensures the symbol's compatibility across various platforms and applications.

Contents

Our complete package includes:

Vector Files

The official Saudi Riyal symbol is available in SVG and PNG formats, featuring a distinctive modern design with angular elements that create a recognizable appearance. The vector graphic maintains exact proportions and paths from the official specification.

Font Files

We provide multiple font formats including TTF, OTF, WOFF, WOFF2, and SVG font. The symbol has been implemented as a custom font with the character mapped to the Private Use Area code point U+E000, ensuring compatibility across systems while awaiting official Unicode adoption.

Unicode Proposal

Our package includes comprehensive documentation for Unicode implementation, complete with character properties, encoding details, and background information.

Web Implementation

For seamless integration into websites, we offer web-compatible implementation with example HTML pages and CSS code for proper display.

Keyboard Input Method

A Python application enables easy input of the symbol across platforms, with convenient keyboard shortcuts and copy-paste functionality.

Extensive Testing

All components undergo rigorous testing for cross-platform compatibility and implementation validation.

Usage Guide

A comprehensive usage guide provides application-specific instructions and best practices.

Technical Specifications

The Saudi Riyal symbol has been created according to precise specifications: - Exact paths and proportions from the official SVG file - ViewBox dimensions of 1124.14 × 1256.39 - Optimization for display at various sizes

Compatibility

Our implementation is compatible with: - Major operating systems (Windows, macOS, Linux) - Web browsers (Chrome, Firefox, Safari, Edge) - Office applications (Microsoft Office, Google Docs) - Design software (Adobe Creative Suite) - Mobile platforms (iOS, Android)

Installation

Simple installation procedures are provided for: - Desktop operating systems - Web projects - The keyboard input application

Support

Technical support and maintenance resources include a detailed usage guide and a test script to verify all components. For additional assistance, the Al injazat technical team is available for consultation.

Legal Information

The Saudi Riyal symbol is the official currency symbol of Saudi Arabia. Users should follow official guidelines provided by the Saudi Arabian Monetary Authority, use the symbol respectfully in financial and commercial contexts, and maintain the symbol's distinctive characteristics without modification.
